£178

Notes

- 30 year life span assumed on projects unless specified otherwise. Total cost / carbon saving expressed as a cost per ton of carbon for one year.
- Not a London Borough.
- Kingston Warm Homes project described as saving 685tCO<sub>2</sub> in first year. Assumed to be over 30yr period as a cost of £2/t does not appear consistent with other projects.
- Westminster ENO LED project had a ten year lifespan only, and annualised cost presented accordingly.
- Total cost may include s106 funding and non-s106 funding.
